## A VISION FOR MALTA'S GRAND HARBOUR

### Villa Bighi's Restoration

The government intends to keep up the momentum of development that has been witnessed in the Grand Harbour these past few years and uphold the record of evident successes: added value to residential properties; which translates into prosperity for owners

## Villa Bighi's Restoration

The restoration of buildings surrounding Villa Bighi will be completed and the surrounding environs enhanced. This space will continue being utilised as a centre for educational activity that makes use of the complete restoration of the old naval hospital.

The government understands that the location and the value of this building

will create the potential to house administrative offices and hold meetings of international organisations, with a connection to Malta. Another possible use is for the site to become the headquarters of high profile regional or international academies that can connect with the cultural, artistic or political activities, giving Malta a deserving position in Europe and the world.

The natural Mediterranean dimension of this site, overlooking the Grand Harbour, makes it the ideal place for a permanent structure of inter-governmental relations in the region.

This idea reflects and strengthens Malta's geo-strategic position and its foreign policy.
